

JAVED M. SHAH

PhD Candidate, CS | MBA, UC Berkeley Haas | CISSP | CISM | PMP | Zachman Certified EA
Chicago, IL · [linkedin.com/in/javedmaqboolshah](https://www.linkedin.com/in/javedmaqboolshah) · javedmshah.github.io · thoughttrain@berkeley.edu

EXECUTIVE SUMMARY

Senior product and consulting leader with 20+ years designing and scaling enterprise-grade identity and AI platforms serving 1B+ users and 100M+ workforce identities globally. Uniquely combines VP-level product leadership — roadmap strategy, PM org building, CxO alignment, and GTM execution — with hands-on consulting architecture depth in AI systems, zero-trust security, cloud-native SaaS, and regulated-industry deployments. Proven across venture-backed scale-ups (Series A to IPO), Fortune 500 advisory, and top-tier enterprise platform delivery. PhD-level AI research in multi-agent systems and NLP, with production implementations including T-RAG (evidence-graph constrained retrieval) and LangGraph agentic accelerators.

CAREER HIGHLIGHTS

1B+ Users / 100M+ Workforce Scaled identity platforms to global population-level reach across workforce and consumer deployments. \$250M+ Pipeline Drove annual new-business pipeline at ForgeRock and 1Kosmos through roadmap differentiation and pre-sales architecture. 233% YoY ARR Growth Scaled 1Kosmos ARR 233% YoY after building the founding PM organization and developer platform.	\$100M ARR Grew ForgeRock Identity Cloud to \$100M ARR in 3 years — the fastest-growing product line in company history. \$150M+ Advisory Portfolio Built Peller's IAM.AI consulting practice, closing \$10M+ in engagements and supporting a \$150M+ client portfolio. \$2.6M Fraud Loss Reduction Reduced retail fraud losses for enterprise customers through identity verification and behavioral biometrics.
---	--

SIGNATURE STRENGTHS

Executive Product Leadership VP-level PM org building; multi-domain platform roadmaps; CxO storytelling; GTM partnership; product operating models; Series A-to-IPO platform execution.	Core Platform & Identity Architecture Access control, identity & user management, delegated administration, API governance, multi-tenant / multi-region / multi-org SaaS, self-service operations, CI/CD, business continuity.
AI & Agentic Systems Architecture Multi-agent orchestration, RAG and knowledge graph integration, LLMOps / AgentOps, agentic memory, generative AI applied to platform operations, predictive insights, intelligent automation.	Cloud-Native SaaS & DevOps Kubernetes, GCP, AWS, Azure; Terraform, CI/CD, microservices, multi-tenant platform design, shared services, cloud-native migration.

INDUSTRY EXPERIENCE

Managing Principal Architect, Identity & AI | [Pellera](#)

Jan 2024 – Present

Building and leading an executive AI and identity advisory practice serving Fortune 500 clients across banking and healthcare. Operating as embedded VP-level product and architecture advisor — defining platform roadmaps, governance frameworks, and AI-assisted operational strategies.

- Grew annual advisory pipeline 10x; closed \$10M+ in engagements; supporting a \$150M+ client portfolio across financial services and healthcare.
- Define platform capability roadmaps, success KPIs (adoption, operational efficiency, governance), and AI-assisted platform operations strategies for enterprise clients.
- Deliver proof-of-concepts and pilots for agentic AI workflows, RAG pipelines, and AI governance and security architectures.
- Serve as trusted executive advisor for CxO-level identity and AI strategy, translating complex architectures into board-ready narratives and phased delivery plans.

VP of Product, Identity Verification | [1Kosmos Inc.](#)

Jul 2021 – Dec 2023

Joined as the founding product leader for a venture-backed decentralized identity company. Built the entire product function from the ground up and drove the platform from early-stage to \$15M Series A and beyond.

- Owned full product strategy for BlockID, a 50M-user decentralized identity platform enabling secure MFA compliant with NIST SP 800-63-3 (IAL2).
- Launched AdminX (self-service administration), DeveloperX (developer.1kosmos.com), identity verification with fraud/liveness/document scanning, and SDK/API integration tooling.
- Scaled a team of 12 (PMs, UX); drove 233% YoY ARR growth and \$50M+ pipeline expansion; reduced enterprise customer fraud losses by \$2.6M across 500+ retail locations.
- Supported \$15M Series A; established product operating model, OKR framework, and cross-functional decision processes across Engineering, Sales, and Customer Success.

Senior Director of Product (Chief Architect), Identity Cloud | [ForgeRock \(NYSE: FORG\)](#) *Jan 2014 – Jul 2021*

Led product strategy and architecture for ForgeRock Identity Cloud, the company's flagship SaaS platform, spanning workforce SSO, consumer CIAM, delegated administration, API security, and lifecycle management. Operated across both product leadership and hands-on architecture roles through Series A to NYSE IPO.

- Designed and owned the core platform foundations of Identity Cloud: access control, identity lifecycle, delegated administration, OAuth2/OIDC/SAML token services, API gateway, multi-tenant architecture, and self-service operational tooling on Kubernetes/GCP.
- Grew Identity Cloud to \$100M ARR in 3 years — the fastest-growing product line in company history; drove \$200M+ annual pipeline and landed top-10 US/EMEA enterprise deployments.
- Scaled platform to 1B+ identities and 100M+ employees; led a PM organization across multiple platform domains partnering with Engineering, Architecture, Security, UX, and GTM.
- Shipped OAuth2 Token Exchange, secret management APIs, B2E/B2C onboarding flows, and embedded authorization microservices; created integration blueprints productized into ForgeRock SKUs.
- Delivered \$20M+ ARR via platform integrations with financial services, telco, and healthcare clients; drove \$2M in new revenue through token-exchange microservices and embedded authorization services.

Director of Product & Professional Services | [Prolifics Inc.](#)

Dec 2010 – Nov 2013

Co-owned P&L, led enterprise IAM product delivery and professional services, and managed a team of 11 security and platform consultants across banking, retail, and healthcare. Defined platform governance models, operational controls, and regulated-industry integration patterns.

- Built and managed a \$15M security product portfolio supporting HIPAA-aligned identity solutions and secure access programs for healthcare and financial services clients.

Senior Architect — IAM & Identity Infrastructure | [Persistent Systems Ltd. \(NSE: PERSISTENT\)](#)

May 2001 – Dec 2010

Led high-scale IAM and secure authentication architecture for regulated healthcare and financial services enterprises across North America, APJ, and EMEA.

- Designed myaccess.ucsf.edu portal serving 100K+ UCSF users; architected national Kaiser Permanente IBM Tivoli IAM rollout for 270K users; served as lead engineer for State Street Bank national IAM rollout (1M+ customers, with IBM Global Services).
- Program Architect for multi-region IAM deployments; built IAM integration layers for healthcare and banking; developed biometric authentication solutions.

RESEARCH & APPLIED AI

PhD research (UIC, expected 2028) in ML, NLP, game theory, and computational complexity — applied to multi-agent system security and enterprise platform intelligence. Research directly informs product strategy for AI-assisted automation, predictive operational insights, and agentic workflow design.

- T-RAG (Temporal RAG): built a knowledge-graph-constrained RAG system for NHI investigation that retrieves directed evidence chains over time, combining semantic layer design with LLM reasoning for auditable, time-aware outputs.
- LangGraph NHI accelerators: production agentic workflows integrating memory, vector databases (pgvector), and enterprise API connectivity for identity and security automation.
- Cognitive Distortion Detection (ACL Rolling Review, with Prof. Natalie Parde, UIC): novel LLM + RLHF pipeline generating synthetic therapist-patient dialogues with labeled cognitive distortions; outperforms BERT-based classifiers on public and synthetic datasets.
- Two papers under review: “Bayesian correlated equilibrium for insider-threat detection” (GAMESEC 2026) and “Regime-switching multivariate temporal point processes with latent directed coupling fields” (TMLR).

CORE COMPETENCIES & TECHNICAL SKILLS

Identity & Access Management	ForgeRock, Okta, Auth0, Microsoft Entra ID, Ping Identity; SSO, LDAP, Active Directory, SAML, OAuth 2.0, OIDC, token exchange, delegated administration
Cloud & DevOps	AWS, GCP, Azure; Kubernetes (GKE/AKS), Docker, Terraform, CI/CD, microservices, multi-region HA, cloud-native architecture
AI / ML & Agentic Systems	LangGraph, LangChain, RAG (T-RAG / evidence-graph retrieval), multi-agent orchestration; vector databases (Pinecone, pgvector); agentic memory (mem0, Redis); knowledge graphs (Neo4j); LLMops (LangSmith, Prometheus, Grafana); AI coding tools (Cursor, Codex)
Security & Zero Trust	CISSP, CISM; NIST SP 800-63-3 (IAL2), NIST SP 800-207, CISA ZT v2; adaptive risk, conditional access, biometric/liveness, fraud detection, FIDO2, FIPS 140-2
Data Science & ML	Python, TensorFlow, Keras, PyTorch, sklearn, Pandas, NumPy, STATA, R, Jupyter; RLHF, LLMs, generative AI
Engineering & Product	Java, JavaScript, C/C++, Python; Agile SCRUM, JIRA, Git; API design, developer platforms, SDK/integration tooling
Blockchain & Decentralized Identity	Decentralized Identity, DAG models, Smart Contracts (Solidity), IPFS, Kantara-certified consent receipts

EDUCATION

PhD, Computer Science — University of Illinois Chicago *Expected 2028*

Focus: NLP, Machine Learning, Cryptography, Generative AI, Game Theory, Computational Complexity

MBA — Haas School of Business, UC Berkeley *2014*

GMAT: 740 · Focus: Game Theory & Strategy · Capstone: Network game design for HP sales throughput optimization

CERTIFICATIONS

CISSP (ISC)² · **CISM** ISACA · **PMP** PMI · **Zachman Certified Enterprise Architect** Zachman Institute · **Okta Certified Consultant**

CONFERENCE SPEAKING & INDUSTRY LEADERSHIP

-
- ROI Operating Model for Identity Verification
 - Identity for Agentic AI, Product Strategy for 2030
 - Secure Passwordless Authentication – Gartner IAM Executive Summit, 2023
 - Building Intelligent SaaS Platforms – ForgeRock Identity Summit, 2023
 - Identity Based Authentication for Third-Party Access – Saviynt Converge TechTalk, 2021
 - OAuth2 Token Exchange for Microservices – ForgeRock Identity Summit, UK, 2019 (sponsored by Development Bank of Singapore)
 - Declarative Authorization Policies in Kubernetes with Open Policy Agent – Berlin, 2018
